

STANDARD OPERATING PROCEDURE

CONSENT PROCEDURE

- 1) Informed consent regarding various treatment procedures should be obtained from the patient/party by the treating physician.
- 2) The doctor should explain the details of the procedures to the patient.
- 3) For children below the age of 18 years, informed consent should be obtained from their parents or guardians.
- 4) If the patient condition is serious, like in profound shock, eclampsia etc., high risk consent must be taken.
- 5) If there is no one to give consent or the patient is unconscious/ unable to give consent, the doctor and the nurse should take a collective decision in the best interest of the patient after informing the hospital administration.
- 6) OT staff must check the consent form on receiving the patient and also before starting surgery (refer to theatre checklist)
